

Fig. 2A is a side cross-sectional view of a cylindrical device. It shows a main body 20 with a front flange 21 and a rear flange 23. Inside, there are three components: B₁ (a dashed rectangle), B₂ (a solid rectangle), and B₃ (a solid rectangle). B₁ is connected to B₂ and B₃ by dashed lines. B₂ is connected to B₃ by a solid line. The distance between B₁ and B₂ is labeled D₁₂, and the distance between B₂ and B₃ is labeled D₂₃. A curved arrow 22 indicates a rotation around the central axis.

Fig. 2B is a top-down view of the device. It shows a circular cross-section with three components B₁, B₂, and B₃ arranged around the perimeter. B₁ is at the top, B₂ is at the bottom left, and B₃ is at the bottom right. Two curved arrows 24 indicate a rotation around the central axis. The angles between the components are labeled Θ_1 and Θ_2 .
